---

## *CORPORATE PROFILE*

## ABOUT US

Since 1988, the world's largest manufacturer of air-powered blast equipment; Clemco has appointed L.C.S. Engineering as its sole distributor for the West Malaysian market. L.C.S. was started upon the basis of quality products that will serve one of the largest industries in the world; the oil and gas market.

With nearly 2 decades pioneering the surface preparation industry in blasting and painting equipment supply as well as technical services, L.C.S. Engineering Sdn. Bhd. has evolved into an international organization serving the oil and gas, shipbuilding as well as general fabrication markets.

We currently carry Clemco, Graco, Elcometer, Korean paint equipment as well as Taiwanese paint equipment.

In the manner that all cars need petrol, L.C.S. supplements its provision of blast equipment with various blast abrasives such as Garnet, Aluminum Oxide, Steel Shot, Steel Grit, Glass Bead and Plastic Media.

Alongside blasting equipment and abrasives, L.C.S. Engineering also carries a wide range of painting equipment to complement its client's requirements, ultimately manifesting itself as a one-stop center for the surface preparation community.

## PRODUCTS & SERVICES

L.C.S. Engineering provides clients with the whole range of top quality blasting equipment and accessories from Clemco International.

For over the past 2 decades, L.C.S. Engineering has been complementing their supply of blast equipment with blast room products from Munkebo Denmark and after a strategic merger now known as Munkebo Clemco.

L.C.S. Engineering has also been engaged numerous times over to reengineer existing blast rooms as well as painting rooms to increase efficiency and production rates.

Our company has become synonymous with quality sandblasting equipment which is why some of our colossal blast room projects include those for:

(Pasir Gudang)

(Malaysia, Iran, Batam, Singapore)

(Subang)

(Port Klang Free Zone)

(Batu Caves)
